Total Sales vs Total Profit By Year

Some Insights from scatter chart

The scatter chart displays the relationship between the sum of sales and sum of profit by segment. Each data point represents a segment, with the X-axis showing the sum of sales and the Y-axis showing the sum of profit. The chart shows that certain segments have high sales and profit, while others have lower values. This information can be used to identify segments that are performing well and those that may need further attention or optimization.
